

Mass

Mass - a.k.a **Mario Masullo** - started playing music because he felt the need for it. **Mass views electronic music as a means of depicting and interpreting reality.** His music-related-research-interests are primarily focused on the "physical" part of the sound. More specifically, he aims at identifying the way imperceptible **sound frequencies become capable of modifying "sound-landscapes"**.

In this respect, the creative process implemented by Mass relies on the distillation of sensory perceptions of a huge variety of life-related activities and events. Through such process, these activities and events alike become part of a sound-centric micro universe. As a result, **music stimulates a wide spectrum of emotional as well as unpredictable reactions.** This in turn creates a mix of different feelings, such as anxiety, confusion, passion and other unknown related attractions.

Mass' first record is a BMG remix. He then started working with Davide Rovito - a.k.a. Dez. They laid the foundation for a label, embodied by a music-related project called "Defrag_Sound_Processing". Then, together with Pasquale Basso, a.k.a. Terrae and Ilic, they have created their own idea-creating-firm, BLK Studios. Among his many accomplishments, Mass has also been selected as the art director of the electronic art festival "Sintesi".

Discography:

as “mass”

avatar41 AAVV – dsp rec. Cd 01

uanama – uanama - maurice soma cdr 01

as “defrag sound processing”

contrasequentem e.p. – gez varley rmx – dsp rec. 12” 02
