

MOU, LIPS!

Andrea Gabriele

Last update: 10 january 2004

italiano:

"Mou, lips! è Andrea Gabriele, da un progetto nato con Emanuela De Angelis.

Una breve stagione di live all'attivo e la pubblicazione nel 2003 per la francese List di "Peanuts and shells geometria" hanno sollevato un a certa curiosità, anche a livello internazionale.

Mou, lips! Esplora le vie di un'elettronica organica, cinematografica e ambientale, in cui le progressioni sono affondi in paesaggi apparentemente rarefatti ma avvolti nella sensazione di presenze umane, di un sentimento aleggiante.

Sonorità fra musica concreta ed elettronica elegante, contribuiscono a tendere fila immaginarie che rinviano ad un ambiente fra la Sonig e la Mille Plateaux, sul cui sfondo si staglia il laptop del Jim O'Rourke più malinconico e metereopatico.

Mou, lips! rappresenta al meglio le emergenze di un territorio italiano di ricerca in piena trasformazione e ridefinizione, candidandosi fra i vati prossimi di un possibile "dolce glitch novo".

From Netmage04 catalogue

english:

"mou, lips! is andrea gabriele and a project born out of his collaboration with emanuela de angelis. A short live session and then the release in 2004 of Peanuts and shells geometria for the french label List, had soon them an interesting prospect at an international level. Mou, lips! explores the modes of an organic, cinematic and enviromental electronic sound, in wich the progressions are embedded in apparently rarefied landscapes though wrapped in the sensation of the human presence, of a hovering feeling.

The sound lies between concrete music and an elegant electronic, contributing in a proffering an imaginary link wich leads to an environment between Sonig and the Mille Plateaux of Snd, where jim o'rourke more melanchonic and meteoropatic laptop stands out from the background.

Mou, lips! represents at best the emergence of an italian research territory in full transformation and redefinition, putting itself as a candidate among the next prophets of a possible "sweet new glitch"
